Kenya.

SUMMARY

I am a full-stack software developer who understands web application projects life-cycle in depth and I'm very capable at all aspects of development from project planning to requirements gathering through writing and testing code, creating documentation and support. I enjoy building everything from small business sites and landing pages to portfolio themes and rich interactive web apps. I am currently seeking long-term contract positions which will allow me to further improve my programming skills.

SKILLS

- Javascript
- JQuery
- React
- HTML & CSS
- Python(Django)
- Angular
- PostgreSQL
- MySQL

PROJECTS

Store Center-Contributor: Web application where users can book slots to keep their goods such as electronics, machinery and many more.

NewsApp: Web application that lists news articles from different sources such as politics and sports.
